

Collaborative Student Project Repository and Innovation Hub (PROSTECH)

Project Description

A web-based platform designed to securely store and manage student projects while enabling collaboration across academic sets. It tracks engagement and highlights high-impact projects for institutional use.

Core Features

- 1 Role-based registration (Observer, Student, Supervisor)
- 2 Supervisor email verification system
- 3 Project creation with structured inputs and document upload
- 4 Collaboration on existing and new projects
- 5 Supervisor approval workflow for submissions
- 6 Engagement system (likes, comments, bookmarks, ratings)
- 7 Leaderboard and analytics (top projects by set/department)
- 8 Advanced search and filtering system
- 9 Real-time notifications

User Roles & Privileges

- 1 Observers: View and comment only
- 2 Students: View, collaborate, create, and comment
- 3 Supervisors: Full access including approval, rejection, and moderation

Project Structure

- 1 Project Title
- 2 Summary/Abstract
- 3 Problem addressed
- 4 Methodology
- 5 Set/Year
- 6 Limitations
- 7 Full documentation

Interface Structure

- 1 Entire School Feed
- 2 Department Feed
- 3 Direct Messages (DM)
- 4 Project display with engagement metrics
- 5 Collaboration and group work sections

Engagement & Rating System

- 1 Likes and comments with notifications
- 2 Weighted ratings (lecturers have higher influence)
- 3 Leaderboard and ranking system
- 4 Graphical analytics (charts and statistics)

Importance

- 1 Reduces duplication of project topics
- 2 Enhances collaboration and innovation
- 3 Improves access to project topics
- 4 Maintains organized academic records
- 5 Identifies high-potential projects
- 6 Encourages student engagement
